TELEPHONIC / VIDEO CONSULTS FOR PATIENTS WITH HAND PROBLEMS

During the lockdown, and social distancing period thereafter Prof Michael Solomons will be offering telephonic, video or online 15min consultations to patients in Cape Town.

Please note that this is a free service to all people residing in Cape Town.

The purpose is to offer you reassurance and advice on how serious a problem might be and whether you are justified in venturing from your home to have a face to face consult. It is for this reason we are restricting this service to those in the Greater Cape Town region. Thank you for your understanding.

To book one of these consultations please contact us as per the details below and one of our team members will be in touch with further details.

- For those with iPhones we can communicate by FaceTime
- For android phones WhatsApp video can be used.
- Skype is also available for those with no Wi-Fi access

Please discuss options with the doctor's secretary

For Prof Solomons:

Visit www.handdoc.co.za to schedule your appointment or make use of the Hand Diagnosis Tool on the website

or

Call Shafeeqah on 021 506 5664

Thanks & Kind Regards

Professor Michael Solomons
